LETTER OF RECOMMENDATION

To Whom It May Concern,

I am pleased to write this Letter of Recommendation for **Mansi Tyagi**, who completed her internship as a **Frontend Developer** at Sync and Explore from 5 February 2026 to 5 April 2026. Mansi has been a dedicated, creative, and highly diligent intern who made meaningful contributions to our product's user interface and experience.

Mansi possesses strong frontend development skills, with excellent command over UI/UX principles and responsive design. She showcased great creativity in transforming ideas into polished, intuitive, and visually appealing interfaces. Her attention to detail, combined with her ability to implement clean and user-friendly layouts, significantly contributed to improving the design quality of our platform.

Throughout her internship, Mansi displayed professionalism, effective communication, and a strong work ethic. She was proactive in understanding requirements, asking the right questions, and delivering tasks on time. Mansi also demonstrated the ability to handle feedback constructively and implement improvements without hesitation.

Her passion for frontend development, eagerness to learn new tools and design approaches, and commitment to quality make her a standout performer. I believe Mansi will excel in future roles involving UI/UX design, web development, or frontend engineering.
